Candies & Confections	Fueling the Fire: Sports Performance, Recovery Drinks, Foods	Meals & Side Dishes	Are You Nuts? New Products Featuring Nuts!	Sauces, Dressings & Spreads	
I Feel Good: Functional Nutrition	Clean Packaging	Personalized Nutrition	Protein	Fresh Look at Fiber	
Meat, Poultry & Seafood	Beverages	Crafted, Artisanal, Premium Foods	Soups	Bakery Foods	
Hot Beverages Coffees, teas, dairy, dairy analogs, premixes & powders, spices (including cinnamon, clove, turmeric, ginger, etc.), vanilla, extracts, botanicals (including CBD).	Salty Snacks The flours, starches, seeds and grains, as well as salts, peppers, spices, nuts, veggies, fruits, cheeses, flavors, and herbs that help make salty snacks so irresistible, plus the oils, leavenings, eggs, gums and flours and starches that make them crunch.	Plant-Based Foods 2.0 Culinary approach to formulating and adding "real" taste, texture and overall umami to plant-based foods..	New Mediterranean Herbs, garlic, and spice blends, peppers, as well rice, pastas, grains and seeds, (wild rice, ancient wheat, barley, rye, and red corn to sorghum, buckwheat, farro, and oats).	Street Eats/Handheld Prepared meats, eggs, wrappings, coatings, pastries, mushrooms, vegetables, fillings, flavor systems and oils and inclusions abound.	
Dressing Up Veggies New value-added, prepared vegetables with breadings, (panko, starches, flours, and seeds), coatings, sauces, and seasonings as well as riced veggies and vegetable noodles.	Formulating with Fruits, Nuts Almonds, peanuts, walnuts, Hazelnuts & pistachios in formulation; Plus whole fruits, fruit pieces, dried fruits, fruit powders and extracts for fillings, layers, sauces and more.	Boosters & Maskers Flavor boosters, from salts and sweeteners to yeast and herbs, citrus and spices, or soy and mushroom extracts bring out the best and can even mask the worst.	Fakes & Substitutes Crafting dairy fakes from oils, nuts, seeds, and grains and meat analogs from grains, legumes, mushrooms, insects, and even scratch in the lab.	Naturally Speaking Natural, organic, sustainable, and non-GMO flavor enhancers, food safety and protection, emulsifiers and conditioners, and colorants for foods and beverages are in high demand. We'll focus on how processors can best make the switch to these clean-label necessities.	
Flours & Starches Flours and starches from grains, seeds, roots, algae and upcycled plant portions.					
Oral Health Probiotics, vitamins premixes, minerals, sweeteners/sugar replacers, prebiotics, fiber	Digestive "Gut" Health The prebiotic fibers such as polysaccharides, oligosaccharides, and resistant starches and the probiotic microbes that work together to help keep a healthy digestive tract and enhance immunity.	Why Weight? Weight management may have been replaced by a "whole health" approach but it's still a key issue calling for help from vitamins, minerals, antioxidants, co-enzymes, botanicals, prebiotics, & probiotics.	Fortification & Premixes Delivery vehicles and formats for antioxidants, energy boosters, phytochemicals, cognitive performance enhancers, botanicals, vitamins and minerals	Water Everywhere Water beverages nutritionally boosted with everything from vitamins and minerals to plant proteins, botanicals and nutraceuticals and fibers.
